

GORMAL
ONE

STUDENT PARTNER
FLAGSHIP PROGRAM

STUDENT PARTNER FLAGSHIP PROGRAM

Gormalone is an Agritech Organization working on a Mission to transform the Life of Farmers using RIGHT TECHNOLOGY and Tools. Our mission is to make farming highly profitable, especially for the smallest farmers living in the most neglected geographies. We are a social impact enterprise driven by the use of robust and flexible technology to achieve our vision of safeguarding India's "nutrition security"

OUR VISION TO NURTURE

To be successful in our mission, we need the right set of talents in the journey. Hence, we are not just scouting talents but are also interested in making them future ready during their graduation program. Our vision for this program is to create a one stop solution of hiring talents. CEOs and senior associates at GormalOne would like to invest time on students and bring the best out of them.

This Immersive Flagship program will engage young energized students keen on using their technological skills to create sustainable impact and provide solutions at the grassroots level.

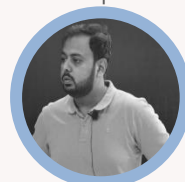

CORE TEAM

Manish Jain

Manish has deep domain knowledge of dairy & multiple sectors due to his 27 Years of investing experience. He uses his knowledge for technological interventions to bring a deeper impact to the projects he supports. He along with his team are now attempting to dramatically transform the Dairy Sector through inhouse developed technology.

Anil Mishra

Anil is a computer engineer. He has a unique blend of rich and diverse experience in Dairy combined with his 12 years experience in IT sector. Anil has conceptualized and developed a very innovative tech Platform, thereby transforming lives of 25,000 dairy farmers. Anil is now driving GormalOne's mission to transform the lives of 10 million dairy farmers.

ABOUT THE PROGRAM

IMMERSIVE TECH PROGRAM

We are proposing to create a strategic hiring and grooming program for your students:

- Create an Agri tech club in the Institute. Students interested in solving tech and non-tech problem statement should be encouraged to join.
- Technology will mostly focus on mobility, AI, ML, IoT, AR, Hardware and electronic designs. Non-tech will focus on graphic design, digital marketing, data analysis, video production.
- Most of the problem statement will be real time and part of future research work.
- Team GormalOne can allocate time for students for talks and workshop. (We are not an institute to train, expectation to train from scratch should be avoided). We can guide and spend required time with students to help them on required learning curve.
- This will provide us a better insight about students leading to an efficient hiring program.

KEY BENEFITS

- Sponsorship for promising students for field visits.
- Internship programs for selected students..
- Provide advisory on final year project. (*Funding for selected projects*)
- Access to industry experts and mentors.
- Insight to agri- business technology.
- Solve real world challenges and work on live projects.
- Certifications.

Come & be a Tech-Insider!
